The tutorial has been established with a mission to be a nucleus of excellence in various fields of education with positive attitude, high values, commitment & dedication. The objective behind the establishment of U. S. Tutorials is to provide a healthy environment for both faculty & students that stimulates a spirit of teamwork, encourage innovation & deliver excellence in related branches of learning. The institute is having its own study centre which is offering classroom programmes for IIT JEE/ NEET at Jaunpur (U.P). The institute also offers coaching to students of classes 9-12 as Pre-Foundation and Foundation career care programme for the preparation of various competitive exams along with excellent performance at school level studies.

We are dedicated to offer an universal learning, self development & career building environment & facilities. We have given priority & attention to 'Education & Discipline' at all levels that are one of the most important factors for nurturing youths.

Our country has shown increasing awareness in education but there has been shortage of educational institutions which can understand learning styles of students. U. S. Tutorials intends to fill the supply side gap in education sector by providing a platform budding edupreneurs to unleash their innovative skills while remaining committed to the cause of development of human potential. U. S. Tutorials focuses on scientific approach to understand the dynamics of learning instead of traditional book & paper method.

We complete the educational cycle of learning & revision with student's feedback so that a better solution can be provided to the students. We believe that with proper guidance an ordinary student can perform outstandingly in competitive exam & with continuous hard work & dedication U. S. Tutorials has been successfully able to fulfil this dream year on year.

Message from Director's Desk

Opportunity before us is immense & the task is onerous. U. S. Tutorials has committed itself to play its humble role in the country's march towards prosperity & global leadership by imparting world-class education to its students in the disciplines of engineering & medical.

As a parent your child is most valuable in your life. Whole life you have worked hard to provide best education & have always dreamt that they grow up as successful & respected citizens of the country.

At U. S. Tutorials we understand your feelings because we have the same dreams as yours for each one of our students.

Our whole team of leading educators consistently works to provide the best academic input & the good learning environment. We base our philosophy on the four principles: Knowledge, Attitude, Skills & Hard work, which we believe are the foundations to success for any student. **As in a race between Lion & Deer, majority of the times the Deer wins. Because Lion runs for food & Deer runs for life. So the students have to consider that "Purpose should always be more important than need."**

Our aim is to develop with various offshoots & make it a qualitative institution on Indian platform & our activities are indication of our vision. We are confident we will achieve this destination with undiluted help, support & dedication of all other stakeholders.

We take this opportunity to wish all our students success in all academic endeavours.
